### SUMMARY

---

Innovative Mobile Application Developer with 3+ years of experience designing and developing scalable, user-centric Flutter and Android applications. Proficient in Dart, Java, Firebase, and RESTful APIs, with a proven track record of delivering high-quality solutions on time. Adept at collaborating in cross functional teams to drive results and passionate about leveraging technology to solve real-world problems on a global scale.

### EXPERIENCE

---

#### Mobile Application Developer

**Credevnet Technologies | Abuja, Nigeria**

*Dec 2023 – Present*

Credevnet Technologies is a software development organization committed to making and delivering robust ICT solutions.

- Co-headed the design and development of cross-platform mobile applications for Android and iOS using Flutter and Dart, contributing to the success of diverse projects including networking and e-commerce apps and improving user engagement by nearly 20%.
- Collaborated closely with a multidisciplinary team of engineers to conceptualize, design, and implement cutting-edge features, ensuring seamless integration with existing app functionalities.
- Played a pivotal role in facilitating collaboration and code management across projects by effectively utilizing version control systems, particularly GitHub. Managed pull requests, resolved merge conflicts, and conducted thorough code reviews to maintain code quality and project integrity.

#### Mobile Application Developer

**Namibra Technologies | Kumasi, Ghana**

*Sep 2023 – April 2025*

Namibra is a leading digital agency dedicated to empowering businesses and individuals with innovative digital solutions.

- Developed and maintained cross-platform mobile applications using Flutter framework, expanding the company's solution reach in the development world.
- Collaborated with a team of developers to implement innovative features and enhancements, including Firebase authentication and storage functionality, leading to an improved development time.
- Actively participated in code reviews, providing valuable feedback and suggestions for improvement, resulting in an increase in code quality and overall project efficiency.
- Participated in brainstorming sessions to propose creative app solutions for client requirements.

New Horizon is a dynamic technology firm specializing in software development, innovative ICT solutions, and digital training.

- Enhanced skills in mobile application development using Java, actively learning and applying industry best practices in design, coding, and debugging.
- Supported team members by sharing insights and assisting with problem-solving in specific areas, fostering a collaborative environment.
- Gained hands-on experience by working closely with senior engineers, deepening knowledge of app development workflows and quality assurance processes.
- Received positive feedback for demonstrating initiative, adaptability, and willingness to assist teammates in overcoming technical challenges.

## SKILLS

- Programming Languages & Frameworks:** Flutter, Dart, Java Core, Springboot, REST APIs
- Tools:** Android Studio, Visual Studio Code, Firebase, RESTful APIs, Getx, Bloc, Provider
- UI/UX:** Material Design, Responsive Design, Animation
- Version Control:** Git, GitHub
- Other Tools:** Postman, Figma, VS Code, CI/CD Pipelines

## EDUCATION

Bachelor of Engineering, Mechanical Engineering (First Class Honor)

Federal University of Technology Akure

Feb 2019 – Nov 2024
